

SAHIL KOURAV

Backend Developer | Node.js · Express.js · MongoDB

+91 9131635893 | sahilkourav02@gmail.com | Gurugram, India | linkedin.com/in/sahilkourav | github.com/sahil-kourav

Profile Summary

Backend Developer with 10+ months of professional experience building secure and scalable applications using Node.js, Express.js, and MongoDB. Proven track record delivering backend solutions for real clients as a freelancer and as an intern at a software firm. Skilled in RESTful API design, microservices architecture, and backend performance optimization. Seeking a full-time backend role to build reliable systems and grow as a software engineer.

Technical Skills

Backend: JavaScript (ES6+), Node.js, Express.js, REST APIs, Socket.io, JWT Authentication

AI / GenAI: Google Gemini, OpenRouter, Prompt Engineering

Database: MongoDB, Redis

Architecture: Microservices, RabbitMQ

Cloud & DevOps: AWS (EC2), Docker, Render, Vercel

Payments & Tools: Razorpay, Git, GitHub, Postman

Work Experience

Backend Developer | Self-Employed (Freelance)

Mar 2026 – Present

- Served as Backend Developer in a 3-member freelance team, building RESTful APIs and server-side services for 3+ clients using Node.js, Express.js, and MongoDB.
- Managed the backend side of the project lifecycle — from requirement gathering through development, testing, and deployment — while coordinating with team members to ensure timely delivery and client satisfaction.
- Built authentication systems, third-party API integrations, and database schemas tailored to client needs.

MERN Stack Developer Intern — Affimintus Technologies Pvt. Ltd. Indore, India

Sep 2025 – Mar 2026

- Built and maintained backend services for multiple web apps using Node.js and Express.js within a development team.
- Designed and developed RESTful APIs adhering to industry-standard best practices, ensuring smooth communication between frontend and backend systems.
- Integrated third-party APIs and managed asynchronous data flows within application workflows.

Projects & Achievements

UpSkale AI — AI-Powered Career Preparation Platform

May 2026 – Jun 2026

Node.js | Express.js | MongoDB | Razorpay | JWT | Google Gemini | OpenRouter | Vercel | Render

- Built an AI-powered interview preparation platform that analyzes resumes, job descriptions, and user profiles to generate personalized interview questions and resume-to-JD match scores.
- Added AI-powered skill gap analysis, personalized preparation roadmap, and ATS-friendly resume generation.
- Engineered an AI mock interview system with performance analytics to evaluate communication, correctness, confidence, and provide per-question feedback with improvement suggestions.
- Implemented a credit-based monetization system with Razorpay integration for purchasing credits.

EverCart — Microservices Based E-Commerce Platform

Jan 2026 – Mar 2026

Node.js | Express.js | MongoDB | AWS | Docker | RabbitMQ | Razorpay | JWT | Microservices

- Designed a microservices based e-commerce platform, separating services for scalability and maintainability.
- Implemented an API Gateway to manage request routing, rate limiting, and authentication across all services.
- RabbitMQ for asynchronous event-driven communication, Razorpay for secure payments, and JWT-based authentication with Role-Based Access Control (RBAC).
- Containerized services with Docker and deployed on AWS (EC2), enabling scalable infrastructure and easier environment management.

Education

Bachelor of Business Administration

Sep 2021 – Jun 2024

Chameli Devi Institute of Professional Studies, Indore

Certifications

Job-Ready Full Stack Development Cohort — Sheriyans Coding School

Jan 2025 – Oct 2025
